

Pure Michigan Talent Connect Career Categories & Types
as of 1/5/2015

Career Types are broad groupings of occupations and careers that utilize similar skill sets and educational backgrounds. Organizing occupations into career types helps you find careers you have the skills to do but may have not ever considered. It also helps the workforce system more accurately assess skill supply and demand in order to plan better workforce programs.

Select a Career Category to narrow down the list of Career Types that may match your skills. When choosing a Career Type that best describes your skill set, you may wish to choose more than one.
